HOLIDAY GIFT GUIDE

SOY KITCHEN CANDLE

The Fresh Wave Soy Kitchen Candle is an ideal gift for any cooking connoisseur who wants guests to focus on the food rather than the odors they leave behind.

How it works (and why it's green): Utilizing extracts of lime, pine needle, aniseed, clove and cedar wood, the Fresh Wave Soy Kitchen Candle is biodegradable and non-toxic. When lighted, the eco-friendly formula is released into the air and the stinky odor molecules are absorbed and then broken down by the plant extracts - so the smell is completely eliminated (rather than masked with a chemical or fragrance). Added Benefits: Housed in a gorgeous glass votive, it burns down evenly for approximately 50 hours. And since it's made of soy, the candle won't release harmful carcinogens into the air (unlike its paraffin candle counterparts). www.freshwaveworks.com.
