Has anyone heard of Fresh Wave? I've been itching to air out the house because of winter and the pets, so the clerk at my vacuum store suggested this product. It's all natural, not tested on animals, and biodegradable. Safe to use around kids and pets! I bought a jar of what looks like clear jelly called Crystal Gel. You leave it open and place it wherever you want (mine is behind our wedding picture and outta sight), and it starts neutralizing odors in the room—it will last 30 to 90 days depending on the air flow where you place it. I also bought a couple of air sprays and the vacuum pearls to place in my vacuum bag—one capful eliminates all of the creepy vacuum odors from what you sweep up. I can't believe how effective these products are! Plus, they don't have any heavy fragrances. They're made of a blend of soya, purified water, and natural extracts of lime, pine needle, aniseed, clove, and cedarwood. It's really a lovely, light fragrance—not at all overpowering. Just CLEAN. Not to sound like an infomercial, but I'm seriously hooked. You can't tell that four dogs and three cats live here!

[The Fresh Wave line includes sprays, gels, candles, pearl packs, vacuum pearls, carpet shake, a laundry and cleaning additive, and a bunch of pet products.]
