---GREEN YOUR ROUTINES---

BACK AWAY FROM AEROSOL SPRAY, SLOWLY ...

Sweaty sneakers, smoky ashtrays, icky kitty litter boxes ... you get the whiff. Sure, you can spray perfume-y, headache-inducing deodorizers that deplete the ozone. We prefer biodegradable, less invasive options like Fresh Wave's line of air-clearing products that use plant extracts (lime, pine needles, aniseed, clove and cedar wood) to break down malodorous molecules. The 3-in-1 Green Home Kit contains a mist spray for bad-news bathrooms, a jar of continuous-release crystals for 24/7 freshness, and a soy candle for onion-chopping sessions in the kitchen, \$29.99.
