

Odor Management Inc. Becomes OMI Industries

Odor Management Inc., a Barrington, Ill.-based manufacturer is now known as OMI Industries [OMI.]

OMI Industries is an international manufacturer of odor control solutions for used in industrial, consumer and commercial applications. OMI manufactures many well known odor management products including Ecosorb®.

OMI Industries' specializes in odor control with its Ecosorb® technology. Ecosorb controls the full spectrum of malodors, eliminating the need for multiple odor control products. Ecosorb is sold and distributed globally through our own company and more than 20 distributors worldwide.

"Our corporation is expanding with a variety of services and equipment offerings. We have updated our name and logo to better reflect the new overall direction our company is taking." states Philip Coffey, Managing Director.

OMI has extensive experience engineering solutions to solve a variety of odor control problems from industries that experience year-round odor problems due to their production process, to seasonal odor problems due to temperature, to occasional odor problems that occur during a particular project.

OMI Industries is a privately-held corporation founded in 1989 comprised of industrial, commercial, and consumer divisions. Its international corporate headquarters are in the greater Chicagoland-area at 18-6 E. Dundee Road, Suite 101 in Barrington, Ill., 60010. OMI has manufacturing, warehousing and a research and development facility in South Houston, Texas; Rising Sun, Indiana and Ventura, California, respectively.
